Research Smarter Webinar Series

The Web of Science™ is the information and technology provider for the global scientific research community.
They provide data, analytics and insights, as well as workflow tools and bespoke professional services to researchers and the entire research community that underpins research – universities and research institutions, national and local governments, private and public research funding organizations, publishers and research-intensive corporations, across the world

We cordially invite you to attend the following webinar sessions to see how the Web of Science solutions can help you access, connect and gain insight from your research.
